

Thank you for purchasing our product. Before installing, using or repairing the product, please read this manual carefully and pay attention to the safety warnings and instructions. This will ensure not only personal safety but also the long-term durability of the product.

INSTALLATION

Switch off the power supply before installation.

1. Insert wall plugs into the pre-drilled holes.
2. Screw the bracket in place or hang it up.
3. Loosen the waterproof gland
4. Thread the supply cable through and connect it to the terminal block.
5. Tighten the first part of the gland.
6. Tighten the second part of the gland.
7. Switch on the power supply.

WARNING

- Before installation, check that the luminaire is not damaged. Do not use a damaged luminaire.
- The luminaire must be installed by a qualified electrician.
- After installation, do not place anything on the luminaire body and do not subject it to any further external mechanical forces.
- Before cleaning the luminaire, ensure that the power supply is switched off. Clean the luminaire with a soft, dry cloth.
- The LED module is not replaceable.
- If the luminaire is not working properly, switch off the power immediately and contact a specialist for repair.
- Do not drill holes in the luminaire body – this will result in a loss of IP protection.
- The external cabling must not be subjected to mechanical stress.

The light source in this luminaire is non-replaceable; at the end of its service life, the entire luminaire must be replaced and disposed of at a designated collection point. This product contains a light source which, for design reasons, cannot be removed for inspection; therefore, the entire product is considered to be the light source. The power cable cannot be replaced; if it is damaged, the device must not be used any further.

A CE Declaration of Conformity has been issued for the product in accordance with applicable regulations.
